

## Tissue Distribution/Metabolite Identification Invited Talk

**Due to the work being proprietary to Merck, I cannot share the slides or a demo of the software.**

I was invited to give a talk to Merck Research Laboratories (MRL), Pharmacokinetics, Pharmacodynamics and Drug Metabolism (PPDM), Tissue Distribution and Metabolite Identification (TD/ID) group. The people that invited me were [Dr. Christopher Kochansky](#) and [Dr. Mark Cancilla](#).

This was an hour long presentation whereby I explained how my Python software [internship project](#) was applicable to 50 of the group members, including the department director, and its usefulness for all other groups in Merck that use Liquid Chromatography-Mass Spectrometry (LC-MS) instruments. The presentation ended with a demo and a Q&A session.

**Thanks in part to the presentation, this group currently utilizes the software regularly.**
